Reference letter re Myriam Birrer

To whom it may concern

I've been a practising homeopath for over 45 years. Since 2001 I was working as a homeopathic doctor and teacher developing a new medical approach to treat epidemical diseases and collective PTSD/trauma in sub-Saharan Africa. In a later stage, I expanded my research to the field of chronic and endemic diseases.

Myriam Birrer Wiratunga, born 1972 from Zug, Switzerland has worked alongside me in a freelance capacity since 2008, as professional colleague.

During this time, she was successfully conducting clinical research and directing medical projects in Africa, Switzerland and Sri Lanka including management and fundraising. Due to her extensive knowledge in the fields of homeopathy, management and intercultural communication she was managing patients, monitoring applications, collecting data, improving medication, discussing methods, organizing networks and negotiating with donors.

She has also helped in making clear and concise documentation to describe our work by writing texts as well as translating them into Sinhala and German.

Myriam is creative, capable of taking the initiative, getting things done and being proactive.

I thank her for her committed cooperation.

Sincerely

A handwritten signature in black ink, appearing to read 'Peter Chappell', written in a cursive style.
